Work Experience

Buta Tech | Frontend Developer October 2022 – January 2024

Programming the company's software projects, familiarizing with all the technical stages of the project and performing work related to the necessary parts; Providing support in solving problems on user computers; Troubleshoot the servers; Troubleshooting of computer networks; Establish and ensure proper operation of common system and application software tools (operating systems, office applications, etc.). Participating in solving immediate problems arising in projects and solving problems directly, at the same time working together with team members; Verify that the existing data of the projects is backed up. Provide information to the team leader and team members related to the work done.

Özgün Yapı Sanayi Ticaret A.Ş | Frontend Developer Intern June 2022 – October 2022

Collaborate with the team to create visually appealing and user-friendly web interfaces. This involved translating design concepts into interactive and responsive layouts using HTML, CSS, and React.js. This Front-End Developer Internship was a valuable learning experience, allowing me to develop a wide range of technical and soft skills while actively contributing to the success of our projects.
